

Ferris Sweep – ZMK Keymap

Dvorak base, with home-row mods on A/S and four layer-tap thumbs. In each cell the **bold** label is what you get on tap; the small grey label is what's held. Pale-grey cells are transparent (fall through to a lower layer); cells marked “—” are no-ops.

Layer 0 – Default (Dvorak)

Base typing layer. Holding any home-row alpha gives a modifier or layer.

'	,	.	P	Y	F	G	C	R	L
A Shift	O L5 Fn	E L1 Mse	U L3 Sy1	I	D	H L4 Sy2	T L2 Nav	N L6 Num	S Shift
;	Q Ctrl	J Alt	K	X	B	M	W L+RAlt	V L+RCtrl	Z
			RCtrl	Space	Space L7 Misc	Bksp Gui			

Layer 1 – Mouse

Pointing and scroll wheel. Held via E on home row.

The diagram illustrates the structure of a 2D grid for a 4x4 grid world. It is divided into two 2x2 sections. The left section shows a 2x2 grid with 'RCIk' in the bottom-left cell and 'LCIk' in the bottom-right cell, separated by a minus sign. The right section shows a 2x2 grid with 'LCIk' in the top-left cell, 'Wh ↑' in the top-middle cell, 'RCIk' in the top-right cell, and 'Wh ↓' in the bottom-middle cell. Arrows indicate movement directions: left, down, up, and right.

Layer 2 — Navigation

Arrow cluster + page/home/end. Held via T on home row.

The diagram illustrates two keyboard layouts. The left layout is a 3x4 grid. The top row contains four empty cells. The second row contains four cells: a left arrow key, an up arrow key, a down arrow key, and a right arrow key. The third row contains four cells: 'Home', 'PgDn', 'End', and an empty cell. The right layout is also a 3x4 grid. The top row contains four empty cells. The second row contains four cells: 'Gui', an empty cell, 'Alt Ctrl', and a function key (represented by a caret and a square with an arrow). The third row contains four empty cells.

Layer 3 – Symbols 1

Math/text symbols. Held via U on home row.

		?		
^	*	&	—	

	—		'	
#	~	/	"	\$
	-	\	,	

Layer 4 – Symbols 2

Brackets, parens, comparison. Volume on thumbs. Held via H on home row.

	:	<	>	;
{	}	(	)	@
	!	[	]	
			Vol-	

		?		
	-	=	+	%
	Vol+			

Layer 5 – Function Keys

F1–F12 across the right hand. Held via O on home row.

The diagram illustrates the layout of the top row of a keyboard. On the left, a 4x4 grid represents the main keyboard area. The second row, third column key is labeled 'Ctrl+Alt'. On the right, a 4x4 grid represents the function key area. The first row contains F7, F8, F9, and F10. The second row contains F4, F5, F6, and F11. The third row contains F1, F2, F3, and F12. The fourth row is empty.

Layer 6 — Numpad

Numeric pad with digits and arithmetic on the left hand. Held via N on home row.

/	7	8	9	+					
0	1	2	3	-				-	
*	4	5	6	=					

Layer 7 — Misc / System

Bluetooth pairing, layer switching, system reset. Held via right inner thumb.

		:	Esc		BT 0	BT 1	BT 2	BT 3	Del
	%	/	Ent		→Mse	Gui	BTclr		
			!		→Def		, L+RAlt	. L+RCtrl	Boot
				Tab	-				

Bluetooth pairing: hold right-inner-thumb (the L7 key) and tap **BT 0–3** to switch profiles or pair a new host. **BTclr** clears the active profile. **→Def** / **→Mse** lock the base or mouse layer; **Boot** enters the bootloader (double-tap reset is easier).
